## Efficient Cleaning For Your Heavy Duty Needs

Industrial cleaning is a critical step in today's manufacturing and transport operations. The ARO® wash pump is a pneumatically driven, portable high pressure cleaning system, ideal for hazardous and heavy duty applications where electric power cannot be used. Driven by the reliable AFX air motor and stainless steel 2 ball lower piston pump, it offers customers easy and economical maintenance for minimal downtime.

- Plug and play - connect to a suitable air supply and operate
- Easy maintenance - individual components and pump service kits are available for a complete aftermarket service
- Reliable - designed by ARO® in full stainless steel for long life and industrial heavy duty use
- Global service - a large international network of ARO® certified service centers
- ARO® Warranty - 5 year warranty

**Hot and Cold Operations:** All materials are certified to work with water and detergent up to 95°C (203°F)

**ATEX CE Certified:** Suitable for hazardous, gas and dust environments, zone 1, II 2 GD and IIB T6

**ARO® AFX Motor:** All pumps are equipped with our efficient, reliable and easy to maintain AFX Motor

**Very High Quality:** All metallic parts of the lower pump and the supporting structure are made of high quality stainless steel in order to guarantee durability in extremely aggressive environments

**High Displacement Pump:** With up to one liter per cycle the ARO® Wash Pump provides high flow rate

### AROClean 23:1
